

Python-3 Classwork

1. 🏏 Your team name is "Super Strikers". Use a string method to make it **SCREAM LIKE A COACH** after a last-ball six!
(Hint: convert it to uppercase)
2. 🤖 Your startup name "Code Masters" needs a **quiet logo** for stealth mode. Whisper it using a string method!
(Hint: convert to lowercase)
3. 🎮 Your gamer tag is "noob slayer". Time to impress — apply a method to make it look **professional** like "Noob Slayer"!
(Hint: use title())
4. 💻 Change "python rocks" into "PYTHON rocks" — just like a software update that keeps the base and only tweaks the top!
(Hint: use capitalize())
5. 🏆 "Champions League" just dropped their new name "Winners League" — use `replace()` to stay updated like a transfer window!
6. 🎤 "coding for all" is a dope startup name. But your AI thinks PYTHON is cooler. Replace "coding" with "Python" and pitch it to investors! 🧠🚀
7. 🎯 You got "Football Cricket Tennis" — break it into a list like you're drafting teams!
(Hint: use split())
8. 🔍 You're playing Guess Who! Find out if "Google" is hiding in "Facebook, Google, Microsoft" using a method.
(Hint: use `in`, `find()`, or `index()`)
9. 🥷 You've got "The Silent Coders" — now use a slicing move to cut out "The" like a ninja trimming bugs!
10. 📦 You've received a list of "GitHub, OpenAI, DeepMind, HuggingFace" — unpack them using commas. What method helps?

11. 🏁 Find the **first player (character)** in "Code Red" — who's opening the match?
(Hint: `index 0`)
12. 🚀 What's the **last character** in "String Bomb"? Who's the finisher in your coding lineup?
13. 📍 Which player sits at index 10 in "ConsoleWarriors"? Find the MVP in the lineup.
14. 🧠 Convert "Artificial Intelligence" to its superhero acronym like "AI" — time to form an elite tech league!
15. 🧑 Turn "Backend Developers" into its legendary dev team acronym — BD. Use your string-fu wisely!
16. 🚀 Your string is "Fly High Sky Kings". Convert it to uppercase, then **swap the case** like a Jet mode toggling!
(Hint: `chain upper().swapcase()`)
17. 🧠 Find out where the letter "C" first appears in "CodingForChampions" — like spotting your fav cricketer in the stadium!
18. 🏟️ You've got "Messi Ronaldo Neymar", and you want to find if "Messi" is still on the team. What method will you use to check?
19. 🗑️ Slice out "Ronaldo" from "Messi Ronaldo Neymar" — like removing a banned player from the squad.
(Hint: use *slicing with indexes*)
20. 🔧 Split "AI_ML_DS" using "_" and make a list of all your tech weapons — what's the method?
